UTKARSH JAISWAL

ASPIRING DATA ANALYST • AI & DATA SCIENCE UNDERGRADUATE

utkarsh2172006@gmail.com | +91-9236064084 | linkedin.com/in/utkarsh-jaiswal-7b2938376 | github.com/utkarsh2172006-design | India

PROFILE

Undergraduate BS Applied AI & Data Science student at IIT Jodhpur, building practical expertise in Python, SQL, Excel, Power BI, and Tableau through real-world projects and job simulations. Skilled at turning raw data into clear, business-relevant insights and actively seeking a Data Analyst internship to apply and grow these skills in a professional setting.

TECHNICAL SKILLS

Programming Language: Python — variables, loops, functions, basic data structures (lists, dictionaries)

Database & Querying: SQL — SELECT queries, WHERE, GROUP BY, basic JOINs

Spreadsheet Analysis: Microsoft Excel — formulas, pivot tables, basic charts, data cleaning

Data Visualization & BI Tools: Power BI, Tableau — building basic dashboards and charts from datasets

EDUCATION

BS in Applied AI & Data Science — IIT Jodhpur *Expected 2029*

Completed 1st Year • CGPA: 7.25

Higher Secondary (PCM) — Physics, Chem., Math *2025*

PROJECTS & JOB SIMULATIONS

Quantium — Data Analytics Job Simulation *The Forage*

- **Data preparation & cleaning:** Processed customer transaction data using Python, handling missing values and inconsistencies to build an analysis-ready dataset.
- **Customer behaviour analysis:** Explored purchasing patterns and performed customer segmentation to uncover trends in buying behaviour across categories.
- **Experimentation & uplift testing:** Designed a benchmark/control store comparison to evaluate a trial layout change, applying uplift testing logic to isolate its impact on sales.
- **Business recommendations:** Translated statistical findings into commercial insights and actionable recommendations for category management, presented in a business-ready format.

Deloitte Australia — Data Analytics Job Simulation *The Forage*

Client Project: Daikibo Industrials (Manufacturing / Telemetry Data)

- **Data exploration:** Analyzed manufacturing telemetry data to identify data quality issues and understand equipment performance patterns.
- **Dashboard creation:** Built dashboards to visualize operational metrics, making equipment health and performance trends easy to monitor at a glance.
- **Operational insights:** Identified recurring operational patterns and summarized findings into business insights to support maintenance and efficiency decisions.

CERTIFICATIONS & EXPERIENCE

- The Forage — Quantium Data Analytics Job Simulation
- The Forage — Deloitte Australia Data Analytics Job Simulation
- IIT Jodhpur — BS in Applied AI & Data Science (Ongoing, 1st Year Completed)

CORE STRENGTHS

Analytical Thinking • Self-Learning • Adaptability • Business Understanding • Problem Solving
